## SUMMARY

Masters Grad, seeking opportunities in the stream of computer science and technology where I can utilize my knowledge and skills towards the growth of the organization.

## EXPERIENCE

**Intern** at **Dataweave, Bengaluru**                                    **Aug 2019 - Sept 2020**

- Developed Account management framework used for configuring User accounts.
- Revamped internal tools for new Account creation and configured the UI for APIs.
- Worked on Reports generation framework which allows the user to download the widget level information in CSVs and XLSX files.
- Revamped the system for account-specific file management, to eradicate the process of file backup after every scrum cycle.
- Build a test suite for all the existing APIs using Postman, which helped the team, to get rid of manual testing after every scrum cycle.
- Wrote custom scripts for report generation.
- Developed scripts for various database and file operations which were used to execute across servers and perform certain operations.
- *Tech stack:* Python, Redis, MySQL, Postman

**Associate Analyst** at **GlobalLogic Technologies, Hyderabad**            **Aug 2016 - Jun 2017**

- Worked for Smart Imagery Team (client: Google, Hyderabad)
- Responsible for analyzing and Testing various process and projects which deal with Google Maps, YouTube, and other various Google projects

**Intern** at **VisionSoft Labs, Warangal**                              **Oct 2015 - Apr 2016**

- Worked for an in-house project for educational institute automation.
- Responsible for UI, database and module design and implementation.
- *Tech stack:* PHP - CodeIgniter Framework, Bootstrap, CSS, MySQL

## TECHNICAL SKILLS

**Programming Languages:** Python, PHP
**Frameworks:** CodeIgniter, Bootstrap, SASS, Opencart
**Database:** MySQL
**VCS:** Git
**Others:** CSS, HTML5, PyCharm, Postman

## EDUCATION

**M Tech in Computer Science & Engineering**                                  **2018 - 2020**
Vellore Institute of Technology, Vellore                                      CGPA: 7.35/10

**B Tech in Computer Science & Engineering**                                  **2012 - 2016**
Ramappa Engineering College, Affiliated to JNTU, Hyderabad                   Aggregate: 63.52%

## ACADEMIC PROJECTS

**Smart Metro Rail Ticketing System**: Designed a system for booking a metro rail ticket using a person's biometric details to cut short the passenger's time and other day-to-day hassles.

**Faculty Feedback App:** Developed a mobile App using Sentiment analysis to score the faculty based on daily feedback.

**Storage reduction in Temporal Database**: Proposed a mechanism to reduce storage space in a temporal database by using time ticks instead of timestamps.

**e-Commerce website using MVC framework**: Designed an e-Commerce website using MVC Framework which takes orders and delivers the food to the customer. The website was designed to deliver food eatables all over Warangal City.

**Hybrid Android App for College**: An app for college maintenance where students can check their profile and the management can send the notifications about the happenings in the college.

## INTEREST AREAS & HOBBIES
Problem Solving, Gardening, Learning new linguistic languages

## FREELANCE PROJECTS
- Fillup.in - B2B Recharge Portal
  - Start to end design, development and execution.
  - Build a multi-user login system for mobile, DTH recharge and value transfer.
  - *Tech Stack*: Codeigniter, PHP, Bootstrap, CSS, jQuery, MySQL, Rest APIs
- Sagsol.in - A Chartered Accountant Firm
  - Automated the complete process of bookkeeping
  - Eradicated the numerous excel sheets which produced non-manageable, erroneous data
  - Helped them to grow their client count.
    *Tech Stack*: Codeigniter, PHP, Bootstrap, CSS, jQuery,MySQL
- eFinserve.in
  - Developed Desktop and Responsive Mobile UI for eFinserve.in which helped them to move faster in mobile application development.
  - Tech Stack: Bootstrap, CSS,
- Apollo Institute of Medical Sciences & Research
  - Developed a responsive website for Apollo Institute of Medical Sciences & Research which helped them to move to host a dynamic website.
  - Tech Stack: PHP, Codeigniter, Bootstrap, CSS
